Executive Summary

Full-Stack Software Developer with hands-on experience building responsive web applications, REST APIs, real-time monitoring dashboards, and data-driven user interfaces. Skilled in JavaScript, React.js, Python, Java, C#, Node.js, Spring Boot, Flask, RESTful APIs, and SQL/NoSQL databases. Strong foundation in data structures and algorithms, software engineering practices, testing, and Git. Interested in developing performant interfaces for real-time data visualization, diagnostics, and monitoring.

Technical Skills

- **Languages:** Java, Python, JavaScript, C#, HTML, CSS.
- **Frontend:** React.js, Tailwind CSS, Bootstrap
- **Backend:** Spring Boot, Node.js, Express.js, Flask, RESTful APIs
- **Database:** MongoDB, MySQL, PostgreSQL
- **Testing:** Jest, Vitest, Unit Testing, Integration Testing
- **Cloud & DevOps:** Docker, AWS, Git, GitHub, CI/CD basics
- **Monitoring & Tools:** Prometheus, Grafana, Kibana (familiar), VS Code, Figma, Three.js

Projects

MCQ Practice Website | React.js, Node.js, MongoDB

- Developed a full-stack MCQ Practice Website that allows users to take topic-wise quizzes, receive instant feedback, and track their scores through a responsive and user-friendly interface.

Personal Portfolio | React.js, Tailwind CSS, Vitest

- Design and develop a portfolio to showcase my skills and experience using a modern frontend framework.
- Optimized performance and UI responsiveness.

Clothing Business Web Application | HTML, CSS, JavaScript

- Developed a full-stack e-commerce platform for a clothing business using modern web technologies.
- Improved frontend efficiency by optimizing layouts, components, and responsive design.

Server Management AI | Prometheus, Grafana, React.js, Flask

- Built a backend-driven system using Flask and REST APIs to monitor server resources in real time.
- Integrated Prometheus for metrics collection and Grafana for visualization dashboards — directly aligned with production observability stacks.

Internship Experience

Java Full Stack Developer Intern | Ally Tech | May 2026 – June 2026

- Developed a **secure and efficient Attendance Management System** with user authentication, attendance tracking, and real-time attendance record management.
- Built a responsive frontend using **React**, developed RESTful APIs with **Spring Boot**, and integrated a **MySQL** database.

Web Development Intern | FrontierWox Tech Pvt Ltd | Aug 2025 – Feb 2026

- Developed and delivered 3 production-grade web applications in a team environment following agile workflows.
- Built RESTful APIs using Node.js/Express.js and Flask; integrated with MongoDB and MySQL databases.
- Implemented unit and integration tests using Jest ensuring code quality and regression safety.

Data Science Intern | Fantasy Solution | May 2024 – June 2024

- To gain hands-on experience in data science by applying theoretical concepts to real-world datasets, developing practical skills in data analysis, visualization, SQL, and machine learning.
- Performed data analysis and visualization on structured datasets using Pandas, NumPy, Matplotlib, and Tableau.

Education

- Master of Computer Applications (MCA), SRM Institute of Science and Technology (2025 -2027) **CGPA: 9.40**
- Bachelor of Computer Applications (BCA), St. Joseph's College (2022 – 2025) **CGPA: 7.37**

Certifications & Languages

- Completed NPTEL certification course on **Programming with Generative AI, Data Structures and Algorithms using python and Machine learning for Engineering and Science application.**
- Solved **150+** coding problems on **LeetCode** and **HackerRank** (DSA, Problem Solving)
